

Banana Bank

DEPOSIT BANANAS. EARN MORE BANANAS.

THE 7-DAY BANK FOR APES

How Banana Bank Works

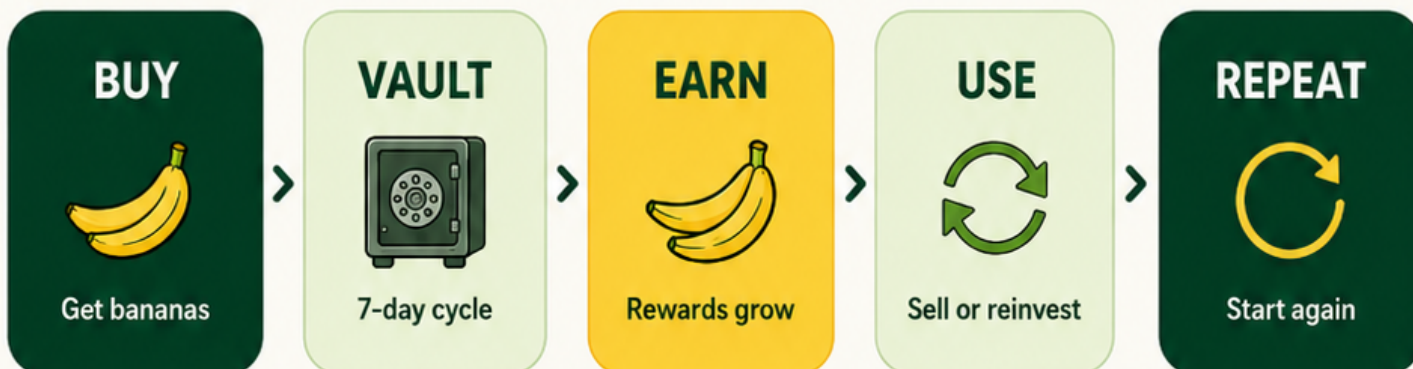

Buy bananas. Lock them up. Earn more bananas.

Banana Bank is a seven-day token-earning system built for apes. Your bananas enter a timed vault and generate liquid banana rewards that can be sold, reinvested, used for account upgrades, or contributed toward bank-wide boosts.

In Banana Bank, every banana you see means \$BBANK Tokens.

THE CORE LOOP

100M

COMMUNITY LEVELS

Banana Bank NFT

Every Ape that joins Banana Bank receives a non-transferable NFT that displays account progress, earning statistics and tier information directly on-chain. It can be viewed in compatible NFT explorers and marketplaces.

Where your balance sits during a seven-day cycle.

THE 7-DAY VAULT

DAY 0

Deposit

DAY 1-6

Earn

DAY 7

Unlock

1 Available \$BBANK

Transferable tokens, including rewards that have already settled into your wallet.

2 Vaulted \$BBANK

Your original balance committed to the seven-day cycle and used as the main earning base.

3 Pending \$BBANK

Apes can see how their \$BBANK Tokens grow in their wallet in real time.

4 Reinvested Earning Power

Temporary earning power created by reinvesting rewards. It resets when the vault opens.

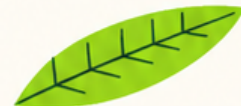

EARNING BASE

VAULTED BANANAS + REINVESTED EARNING POWER

Rewards stop accruing at the vault-end timestamp. Any rewards earned before that point remain claimable later under the contract's lazy-settlement model.

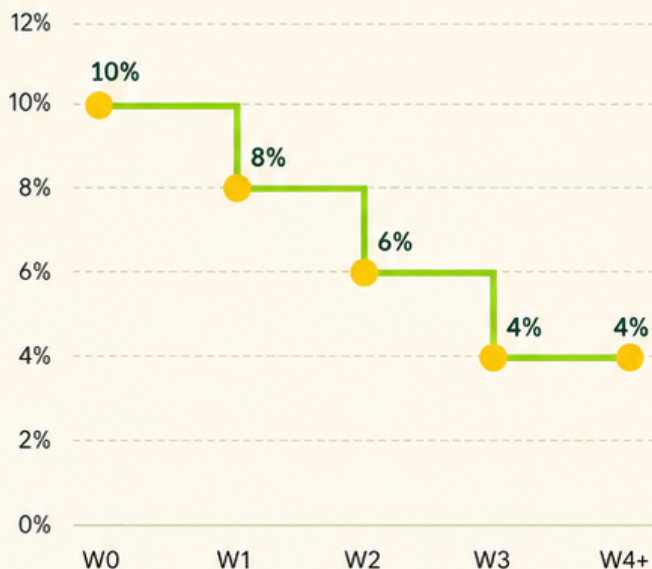

03 \$BBANK Daily Rate

Level up your account and make the same deposit work harder.

BASE BANANA RATE / WEEK SINCE LAUNCH

BASE RATE

The base daily rate begins at 10%, drops by two percentage points each full week, and reaches a hard floor of 4% per day from week three onward.

BONUSES STACK ADDITIVELY

Account tier, community level, contributor, burn and buyer bonuses are added to the base-rate multiplier rather than multiplied into one another.

ACCOUNT TIERS

TIER	EARNING MULTIPLIER	UPGRADE COST	SELL TAX
1	100%	-	7%
2	120%	3% of locked \$BBANK	6%
3	135%	3% of locked \$BBANK	5%
4	155%	3% of locked \$BBANK	4%
5	175%	3% of locked \$BBANK	3%
6	190%	3% of locked \$BBANK	2%
7	210%	3% of locked \$BBANK	1%

REINVEST YOUR BANANAS

Reinvest earned bananas to increase earning power for the rest of the active cycle. Reinvested power is not principal and resets when the seven-day vault opens.

Boost the Bank

When transacting in the Banana Bank apes burn bananas into the community upgrade fund. Each completed level permanently increases the earning bonus for every active account.

COMMUNITY LEVELS

LEVEL	TOTAL CONTRIBUTED	PERMANENT BONUS
1	250,000	2%
2	500,000	4%
3	1,000,000	6%
4	3,000,000	8%
5	5,000,000	10%
6	7,000,000	12%
7	9,000,000	14%
8	15,000,000	16%
9	20,000,000	18%
10	25,000,000	20%

Permanent Bank Upgrade

Every completed community level adds a permanent bonus for all active accounts.

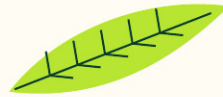

BANK-WIDE BANANA BOOST

EVERY 300,000 BANANAS BURNED

+25% EARNINGS FOR ALL APES - 3 HOURS

Every burn counts: upgrades, reinvesting, community contributions, sell tax, principal reduction and early-exit penalties.

Know what happens before you cash out.

SELL TAX

ACCOUNT TIER	SELL TAX
1	7%
2	6%
3	5%
4	4%
5	3%
6	2%
7	1%

ACTIVE-VAULT SELL PENALTY

Every sell is taxed and the tax is used to auto grow the liquidity pool. Higher account tiers reduce this tax.

While the vault is active: selling rewards also removes locked principal equal to 10% of the total amount sold. Splitting a sale into smaller transactions does not avoid it.

EXIT PATHS

WAIT FOR THE VAULT TO OPEN

Your original bananas unlock automatically after seven days. Earnings stop at the end timestamp, your account tier resets, and you can begin another cycle.

BREAK THE VAULT EARLY

A 50% penalty applies to your vaulted balance plus accrued rewards. Half is returned, half is burned, and all account statistics reset.

WHERE BANANAS GET BURNED

ACTION	EFFECT
Account upgrade	100% of upgrade cost burned
Reinvest	100% burned → temporary earning power
Early exit	50% of principal + rewards burned
Sell Tax	1-7% of every sell burned (if auto-LP is disabled)
Burn vaulted tokens on yield claim	10% of the claimed tokens

06 Boosts and Quick Actions

Extra perks for active apes.

FRESH DEPOSIT BONUS

During an active cycle, a qualifying banana purchase can temporarily increase your earning rate. Consecutive qualifying buys make the boost stronger.

QUALIFY

Buy > 10% of current principal

BASE

+20% for 6 hours

SCALING

+3 points per consecutive buy

CAP

Up to +50% total

BONUS

Yield Bonuses from holding stocks on RH chain:
At least 1 NVDA: +5% At least 1 TSLA: +5% At least 1 AAPL: +5%
Maximum: +15%
Each stock is counted only once.

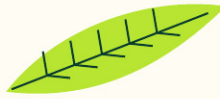

RESET AT VAULT EXPIRY

The buyer boost and consecutive qualifying-buy counter reset when the seven-day cycle ends.

QUICK ACCOUNT COMMANDS

SEND TO YOURSELF	ACTION
1 BANANA	Settle earned bananas
2 BANANAS	Reinvest all liquid earnings
3 BANANAS	Upgrade account tier
4 BANANAS	Break the vault early - 50% penalty
5 BANANAS	Lock your \$BBANK Tokens in the Vault for 7 days. Used to speed up lock time and relock.

Worked examples using the launch-week 10% base rate.

BASIC ACCOUNT

Tier 1. No community bonus. No active boosts.

$$10\% \times (1 + 0 + 0 + 0)$$

10.0% / DAY

UPGRADED ACCOUNT

Tier 4 (+55%), Community Level 5 (+10%), contributor boost (+33%).

$$10\% \times (1 + 0.55 + 0.10 + 0.33)$$

19.8% / DAY

MAX-STACK EXAMPLE

Tier 7 (+110%), Community Level 10 (+20%), contributor (+33%), burn boost (+25%).

$$10\% \times (1 + 1.10 + 0.20 + 0.33 + 0.25)$$

28.8% / DAY

4% FLOOR EXAMPLE

The same additive stack after the base rate reaches its 4% floor.

$$4\% \times 2.88$$

11.5% / DAY
